## EDUCATION

**Georgia Institute of Technology** Atlanta, GA

*Bachelor of Science in Computer Science, Dean's List*

**GPA:** 3.82

**Threads:** Information Internetworks and Intelligence

**Minor:** Financial Technology (FinTech)

**Expected Graduation:** May 2027

**Relevant Coursework:** Object Oriented Programming, Data Structures, Algorithms, Computer Organization, Databases, Statistics, Project Management Methodology, Finance and Investments, Artificial Intelligence

---

## EXPERIENCE

**Software Engineer Co-op, Delta Airlines**

**January 2026 - Present**

- Supported end user and internal applications
- Automated workflows for finance, legal, and IT departments

**Mobile Development Intern, Naos Blockchain Inc.**

**May 2025 - Aug 2025**

- Developed Android and iOS app using React Native and Expo
- Created unit tests that improved UI-rendering performance by 25%
- Deployed app and distributed for internal testing

**Teaching Assistant for Data Structures and Algorithms, Georgia Tech**

**April 2025 - Aug 2025**

- Led weekly recitation for over 300 Georgia Tech students learning data structures and algorithms
- Debug students code, hold office hours, grade exams and assignments

**Research Assistant, Georgia Tech Research Institute**

**January 2025 - Present**

- Used Python and LiDAR to program robot navigation algorithms
  - Leveraged Robot Operating Systems and Arduino to conduct robot movement
  - Improved obstacle detection accuracy by 20% in autonomous test runs
- 

## PROJECTS

**WanderSync | Full Stack | Java, XML, Firebase**

**August 2024 - December 2024**

- Worked with a team of 5 students to create an Android app that allows users to collaboratively plan travel itineraries
- Implemented data visualization graphs to help users track trip progress and activity completion

**StoreView | Full Stack | Python, APIs**

**February 2025**

- Built a web application and algorithm that calculates impression scores for potential storefront locations
- Integrated data science and analytics to provide insights for business owners

**Hacklytics: Traveraal.ai Hotel Finder | Backend Coder | Python**

**February 2024**

- Engineered a web app utilizing Traveraal.ai's dataset to enhance hotel search functionality
  - Integrated AI with Qdrant for similarity searches based on user input
  - Leveraged GPT-2 for natural language processing to generate user-friendly explanations
- 

## SKILLS

- **Frontend:** HTML, CSS, JavaScript, React
- **Backend:** Python, Java, APIs, JavaScript, C, TypeScript, MySQL
- **Tools:** Github, Android Studio, ROS, Postman, Docker, XCode, API, Firebase, MongoDB, Agile
- **Soft Skills:** Leadership, Time Management, Communication, Adaptability, Self-Motivation, Collaboration
